

Industrial Hygiene

Occupational Health & Industrial Hygiene exposure assessment provides industries with the benefit of tracking as well as understanding existing and anticipated exposures to various chemical, physical and biological contaminants to the workforce working on shopfloor. It helps to qualitatively assess health hazards activity-wise and also quantify actual exposures these health hazards.

Our Services

- Occupational Health Risk Assessments
- Industrial Hygiene Quantitative Exposure Assessment
- Personal Air Monitoring
- Personal Noise Monitoring & Site Mapping
- Vibration Monitoring
- Heat Stress Monitoring & Work Load

Why We.....

- Sample & analyze more than 4000 chemicals
- NIOSH & OSHA sampling & analytical guidelines
- Sampling within breathing zone
- Hi-tech equipment
- Flame-proof & explosion –proof monitoring equipment
- Analysis at an AIHA Accredited Laboratory, USA
- Involvement of technical & qualified team
- Unbiased reports with recommendations & suggestions
- Members includes CIHs, IHs, chemical engineers, etc

42 A/B, Yoginagar Township, Nr Zenith Tins, N H No. 08, Channi, Vadodara, 391740 GUJARAT, INDIA

We follow

www.ihs.co.in

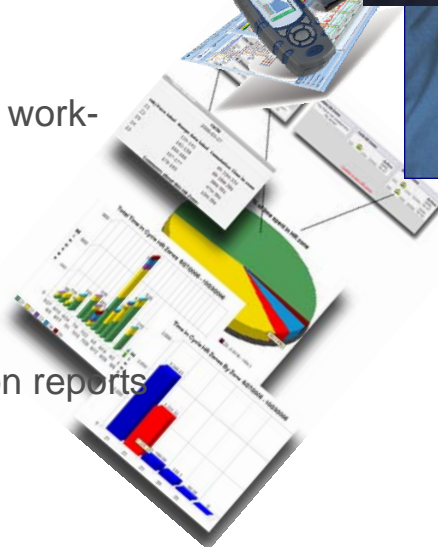

Occupational Health Risk Assessment

- Activities based qualitative risk assessment
- Prioritization of quantification matrix
- Health hazard identification
- General recommendations & suggestions
- Chemical matrix preparations as per it's toxicity and other parameters

Industrial Hygiene Quantitative Exposure Assessment

- Quantification of health hazards
- Various monitoring parameters
- Specific recommendations & suggestions
- Engineering control effectiveness check
- Pre & Post exposure quantifications
- Personal Air monitoring
- Personal Noise monitoring
- Area mapping and color codifications
- Vibration monitoring
- Heat stress assessment including work-load calculations
- Illumination monitoring
- TWA versus TLVs
- Highly technical work quantification reports
